SUBJECT: MIGRATORY BIRD AND THREATENED AND ENDANGERED SPECIES SURVEY
OF BUILDING 443 TANK 4 ABANDONMENT WORK SITE - MBM - 014 - 96

On February 15, 1996, Ecology personnel inspected the Building 443 Tank 4 abandonment work site for bird nests and for potential impacts to threatened or endangered species. No Bird nests or threatened or endangered species concerns were identified. Because this is an extremely disturbed location occupied by extensive industrial structures, it is considered poor habitat for most species. No further inspections will be required for the tank abandonment project at this location.

Should you have comments or require further information, please call me at extension 3560.
